JOHN ECHOLS. whose means, health or other circ musta, ces, do not Princeton Clarion insert to amount of \$1.00 and permit them to increase the number of their family without great inconvenience, suffering, or perhaps risk of life. A method of avoiding these troubles and dangers, at will, (resently discovered by a celebrated French Physician) is fully communicated in this work, so that any person may avail himself of it at once, without purchasing any instrument, medicine, or other article, from the author. The means of prevention here set forth, cost comparatively nothing, and are within the reach of all. The process is new, safe, intalliable, convenient, simple, and can-not injure the health of the most delicate. Not does it curtail matrimonial privileges in the least.

The object of this work can be shown to be of the highest utility, and sustained by the soundest principles of prudence, political economy, and virtue.— It shows how a physiological effect may be produced, scientifically and without injury to the constitution, which thousands attempt to accomplish by the most unwise and reprehensible means. The object is by no means new to the world. The means will be eas teemed by all scientific, right-minded and sensib-l people, as a discovery in physiology of the highers consequence to public morals and happiness.

Love, and the desire, for union between the sexce, will be indulged, talk of prudence as we may .-Without marriage, we have, in all countries, a debasement of one sex, and the criminal indusence of he other; with marriage, and the unrestrained indul gence of the natural instinct, very often suffering and misery of the most fearful character. mothers of a numerous offspring, and who reasonably fear that each period of confinement will terminate their existence, will hail the discovery of this certainmeans of relief with unbounded joy. Let all such unfortunate and unhappy wives lose no time in obtaining this important work. It will be to them a precious boon through life, and prevent many an eary and premature death.

Scrofula, Consumption, Insanity, Apoplexy, Di. ease of the Heart, and other horrible complaints, capable of transmission from parent to child, aftin t many worthy people, who, at the same time, are as capable of enjoying themselves in the marriage state as their more fortunate fellow beings. Shall such persons refrain from marriage on this account, or shall they marry and give birth to a teeble offspring, destined to a life of suffering or an early death !--The answer to these serious questions will be found in the work here recommended.

Early marriages are strongly advised by all philosophers and writers upon social and political subjects. Early marriages beyond all question, tend to promote virtue and happiness; and with the power of regulating the procreative functions, made known in this work, may be treely entered into, without fen;
